

CLIENT FOCUS

GOVERNMENTAL

GZA performs subsurface investigations; above- and below-water visual and rope-access inspections; and hydrologic & hydraulic, stability and seepage analyses on government dams throughout the United States

GZA is proactive by design. Federal, state and municipal agencies seek multidisciplinary engineering and scientific strategies from firms with the depth to address their needs, the knowledge to navigate complex regulatory and permitting environments, and the local familiarity to understand unique stakeholder issues. GZA is a proven partner on government projects whose sound counsel balances objectives while managing realistic limitations. With a practical approach to all projects and the ability to address multiple disciplines from within the same contract, GZA responds to transportation, infrastructure, engineering, environmental, ecological, and water-related issues from its company-wide stable of resources that spans numerous disciplines and offices throughout the United States. This up-front value mitigates schedule delays and cost overruns, which helps maintain positive profiles in sensitive public forums. Whether directly for government agencies or on a team with other engineers and architects, GZA has the demonstrated quality, trust and diversity of work to accomplish the goals of government projects in numerous environments. When searching for a firm with a strong technical reputation and the local and national know-how to meet issues head-on, choose the firm with the ability to address technical requirements from a broad, experience-based point of view. **Choose GZA.**

Representative Governmental Clients

GZA coordinated dredging activities with the USACE, municipalities and regulators to permit the beneficial use of dredge materials for this beach nourishment project

Proactive by Design

GOVERNMENTAL

Proactive by Design. Our Company Commitment. Excelling as a multi-disciplinary, multi-office firm of proactive, bright, and dedicated people, GZA supports our clients and our profession through demonstrated expertise in each of our five core service areas. Woven together, these services integrate with each of our client-focused markets, providing unparalleled value from a single company. **We are Proactive by Design. We are One Company. We are GZA.**

Geotechnical Services

- Subsurface Investigations
- Deep and Shallow Foundation Solutions
- Rock Slope Characterization, Stability Assessment, and Rock Fall Mitigation
- Soil Slope Analysis and Stabilization Design
- Tunneling and Underground Construction
- Earth Support Design and Dewatering
- Seismic Evaluation
- Geothermal System Design
- Landfill Design
- Instrumentation and Deep Foundation Testing

Environmental Services

- Environmental Site Assessment and Investigation
- Site Remediation
- Environmental Health and Safety Regulatory Compliance
- Air Quality
- Hazardous Materials Management/ Demolition
- Sustainability Advisory Services

Ecological Services

- Wetland Delineation, Assessment, and Design
- Biodiversity, Habitat, and Rare Species Assessment
- Aquatic Toxicity Testing
- Environmental Impact Studies
- Natural Resource Permitting
- Erosion and Sedimentation Control Design and Compliance Monitoring
- Ecological Restoration Design
- Invasive Species Management
- Water Quality Assessment and Planning
- Marine and Freshwater Habitat Analysis

Water Consulting Services

- Marine and Waterfront Structures
- Dams and Levees
- Water Resources
- Climate Change and Hazard Planning

Construction Management Services

- Project Management
- Program Management
- Demolition and Decommissioning
- High Risk Remediation/ Specialty Clean Construction
- Construction-Related Building Services
- Asbestos, Lead, PCBs, and Mold Abatement

As part of its Dam and Levee inspection services, GZA performs inspections, drilling and instrumentation installations in structures such as this inspection galley located deep within a concrete gravity dam
